

الانترنت

The Internet is a global network that connects computers to each other. It is a network of networks, without a control center, made up of millions of public, private, academic, commercial and government networks.

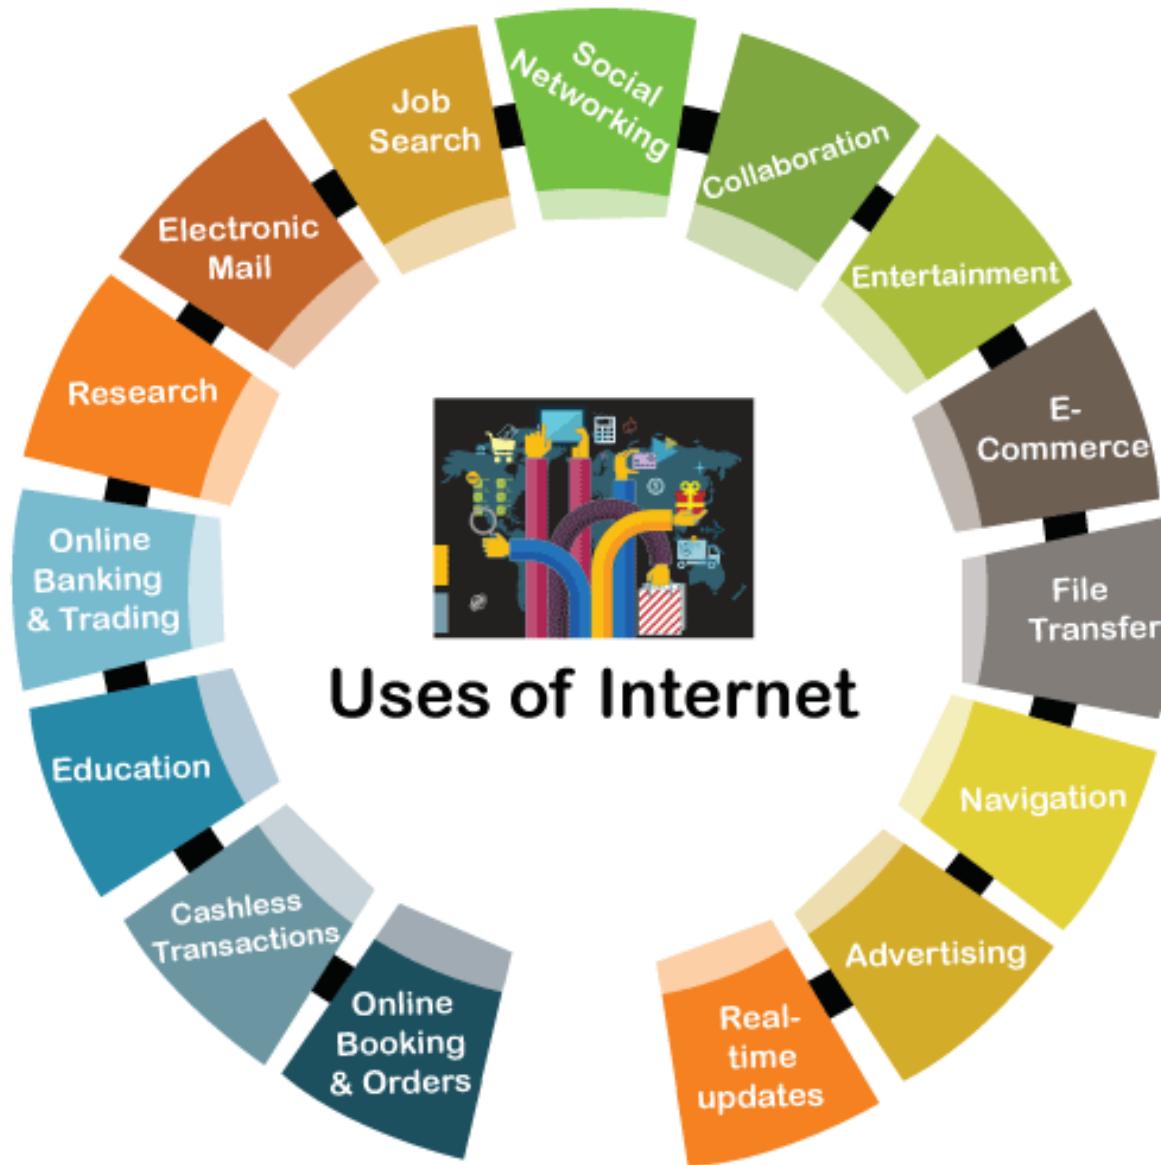

The Internet allows access to services such as messaging, file transfer, chat or web browsing using different software including the web browser.

الانترنت هي شبكة عالمية لربط أجهزة الكمبيوتر مع بعضها البعض ، وهي شبكة الشبكات من دون مركز تحكم

تتألف الشبكات من الملايين من الشبكات العامة والخاصة منها الأكاديمية والتجارية والحكومية توفر الانترنت الوصول الى الخدمات مثل الرسائل ونقل البيانات والدردشة وتصفح المواقع باستخدام برامج مختلفة من بينها متصفحات الويب

الاستخدامات الأساسية للأنترنت the main uses of internet

زر القائمة: يسمح بفتح قائمة تحتوي على إدارة التبويب العناوين الخيارات المتقدمة خصائص المتصفح ،،،

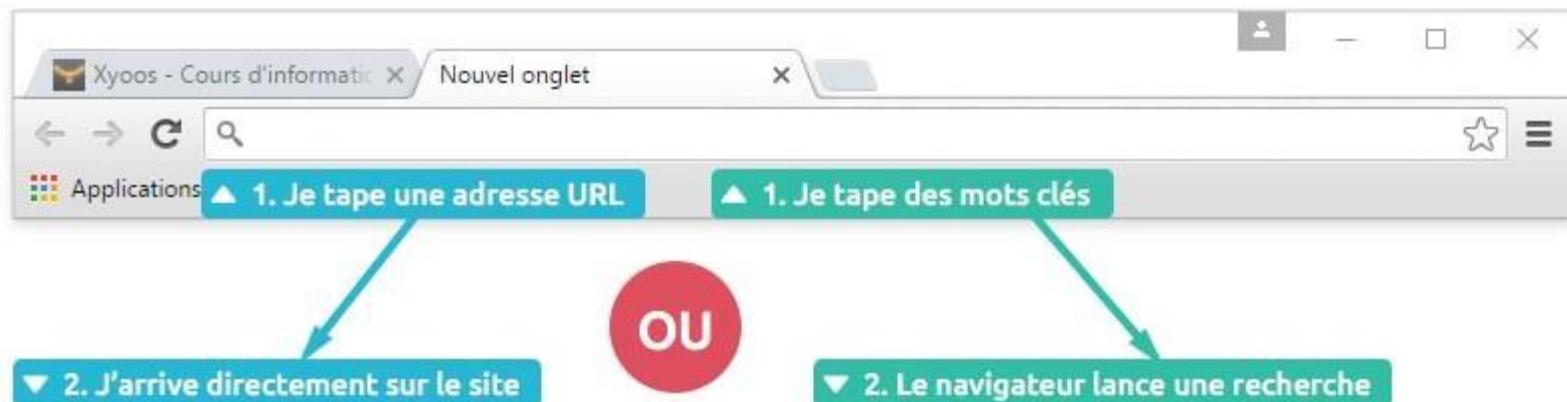

Browse the Internet

تصفح الانترنت

If you know the URL address of the website you wish to contact, you will need to type it in the address bar, for example: www.univ-jijel.dz

If you don't know the address, type in keywords or a rough name and the search engine (Google, for example) will search with the most relevant results first.

Search engines

A search engine is a site that indexes all other websites by allowing you to search for resources (web pages, forums, images, video, etc.) associated with a phrase, a question, or even keywords etc.

محركات البحث هو موقع يقوم بفهرسة جميع المواقع الأخرى ويسمح بالبحث عن الموارد (صفحات الويب منتديات صور فيديو ، الخ) المرتبطة مع الكلمات المفتاحية سواء كانت جملة او سؤال

Google is currently the most used search engine in the world. We also find Yahoo! And Bing (from Microsoft). Google automatically corrects your erroneous searches, suggesting similar results based on your searches, allowing you to search on Google Maps (Geographic Map System) or among images.

Search engines

Google Search

Microsoft Bing

Yahoo! Search

Ask.com

DuckDuckGo

Yandex

AOL Search

Ecosia

Brave Search

Baidu

Examples of Search Engines

- What does connecting to the Internet require?
- Describe the application purposes of the Internet
- People say the Internet has revolutionized the way we live, what does this mean?
 - What do search engines do? Give examples of commonly used search engines.

Email البريد الإلكتروني

An **email** is a message sent from one computer to another using the Internet. It is most often called e-mail (electronic mail).

Anyone connected to the Internet can send and receive messages anywhere in the world. You just need to know the recipient's email address and have software or an email site. It is possible to link (attach) one or more files to an e-mail, it is a way to send a text, a photo or a video.

البريد الإلكتروني هو رسالة يتم إرسالها من حاسوب إلى آخر عبر الانترنت
يمكن إرفاق ملفات في رسائل البريد الإلكتروني مثل صور فيديو روابط تشعبية ،، الخ

Some definitions :

Email software: is software designed to create an email account in a database, for example: Gmail, Yahoo, Hotmail, etc.

برامج البريد هو برنامج مصمم لإنشاء حساب بريد الكتروني في قاعدة بيانات مثل Gmail

Web messaging (Webmail or web email): is a web interface making it possible to send, consult and manipulate e-mails directly on the Web from a browser.

Electronic address (email address): identifies an email box, for example:
abc_ef@gmail.com , elearning@univ-jijel.dz

عنوان البريد الإلكتروني يعرف علبة البريد الإلكتروني مثل elearning@univ-jijel.dz

Email account: in addition to the email address, an email account includes a set of information concerning a user, such as: name, date and place of birth, password, address, etc.

حساب البريد : هي مجموعة من المعلومات الممثلة للاعضاء المسجلين مثل الاسم تاريخ الميلاد
العنوان كلمة المرور

Attachments: An attachment is a file that is sent with an email. The file can be sent in a separate message.

المرفقات هو عبارة عن ملف مرفق يتم ارساله مع الرسالة الالكترونية

Email البريد الإلكتروني

Email addresses consist of the following 3 elements:

تكون عناوين البريد الإلكتروني من 3 عناصر

identifiant@serveur

The local part: usually identifying a person (alia, yacine, med123) or a service name (eLearning, info, sales, postmaster)

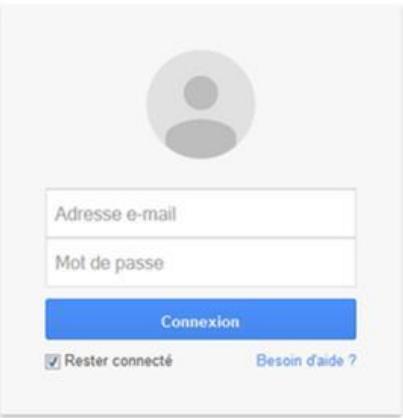

The separator character '@' (at): meaning 'at' in English ("at" or "at")

The server address: generally, is a domain name identifying the company that hosts the email (univ-jijel.dz, gmail.com, outlook.fr, etc.)

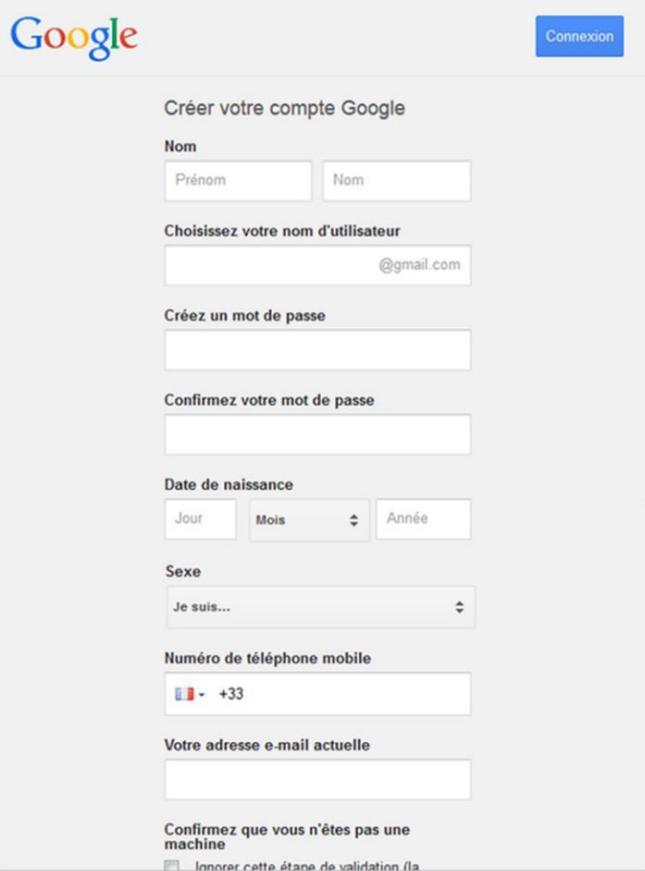

Creating an email account

1- Access the webmail page by opening your web browser, and typing the email address, for example:
www.gmail.com

2- Click on the button "Create an account" from the Gmail home page, a form immediately appears. Personal information is requested by the courier service. Fill in all the fields, then read the conditions of use of the Gmail service

The image shows the Gmail login page. At the top is the Google logo and the slogan "Tout Google avec un seul compte". Below that is a message "Connectez-vous pour accéder à Gmail." A large input field for an email address is followed by a password field. Below these is a blue "Connexion" button. Underneath the buttons are two links: "Rester connecté" with a checked checkbox and "Besoin d'aide ?". At the bottom of the page is a "Créer un compte" link.

The image shows the "Créer votre compte Google" (Create your Google account) form. It includes fields for "Nom" (Name), "Choisissez votre nom d'utilisateur" (Choose your username) with a pre-filled "@gmail.com", "Créez un mot de passe" (Create a password), "Confirmez votre mot de passe" (Confirm your password), "Date de naissance" (Birth date) with dropdowns for Day, Month, and Year, "Sexe" (Gender) with a dropdown menu, "Numéro de téléphone mobile" (Mobile phone number) with a flag icon and "+33" code, "Votre adresse e-mail actuelle" (Your current email address), and a CAPTCHA section at the bottom. There is also a "Connexion" (Login) button in the top right corner.

Creating an email account

- 3- Check the box "I agree to Google's Terms of Service and Privacy Policy".
- 4- At the very end of the form: Click on "Continue to Gmail", the Gmail interface opens immediately. There "mailbox", in which you see 3 emails sent automatically by the Gmail team.

The screenshot shows the Gmail inbox interface. At the top, there are buttons for 'Gmail' (with a dropdown), 'NOUVEAU MESSAGE', and navigation icons. Below this, the inbox is divided into three main tabs:

- Principale**: Shows 3 messages from 'L'équipe Gmail'. One message is highlighted with a star and has a reply icon. The subject is 'Bienvenue sur Gmail - Bonjour Pierre Bienvenue dans Gmail Découvrez votre nouvelle boîte de réception Grâ...'. A small note below says 'Retrouvez Gmail sur votre mobile - Bonjour Pierre Retrouvez Gmail sur votre appareil mobile où que vous soyez'.
- Réseaux sociaux**: Shows 1 new message from 'Équipe Google+'. The subject is 'Tirez le meilleur parti de Gmail - Bonjour Pierre Conseils relatifs à l'utilisation de Gmail Chattez directement...'.
- Promotions**: Shows 0 messages.

On the left side, there are sections for 'Boîte de réception (3)', 'Messages suivis', 'Messages envoyés', and 'Brouillons'.

The emails you receive next will be categorized into 3 tabs which allow you to better sort them:

The “Main Inbox” tab: which brings together your discussions (email exchanges) exchanged with your contacts.

عَلْبَةُ الْاسْتِقْبَالِ الرَّئِيْسِيَّةِ

The “Social Networks” tab: which brings together all notifications from social networks such as Twitter, Facebook, etc., if you have an account created with this email.

الشَّبَكَاتُ الْاجْتِمَاعِيَّةُ

The “Promotions” tab: which brings together newsletters (new products), promotional offers that you may receive.

تَبْوِيْتُ الْعَروْضِ

Consultation and reading of your received messages

After connecting, click on the "mailbox"

1) To read a message, click on its title (subject) to display it in full.

The image consists of two screenshots of a Gmail inbox. The top screenshot shows the inbox with several messages listed. The bottom screenshot shows a single message from ns-users@googlegroups.com open in the details view. Three blue circles with numbers 1, 2, and 3 point to the subject line of the first message, the open message details view, and the context menu options respectively.

1) Click on the subject line of the message you want to read.

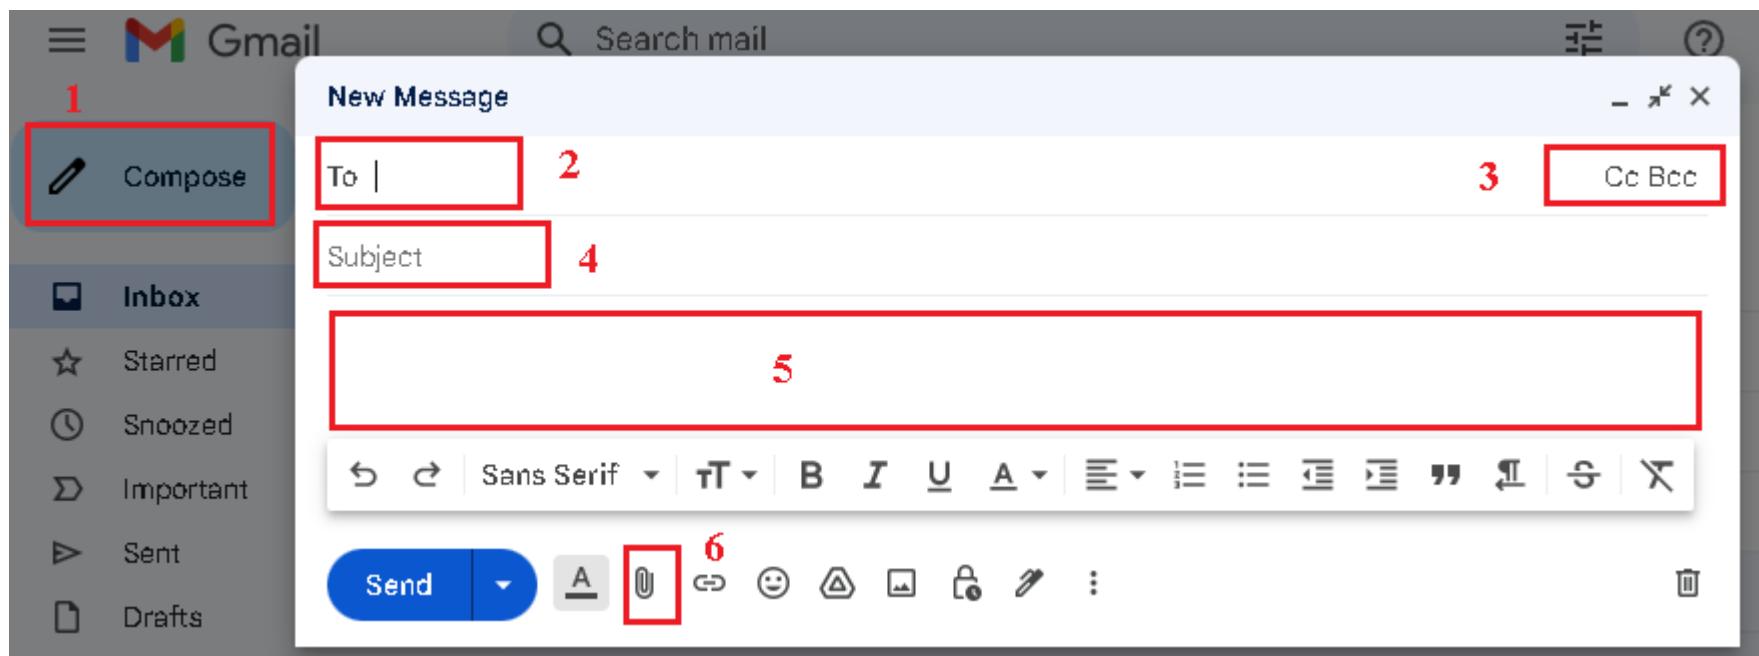

2) The message will open in a new window. You can see the recipient's name, the date it was sent, and the message content.

3) A context menu will appear with various options such as Répondre (Reply), Transférer (Forward), and Supprimer ce message (Delete).

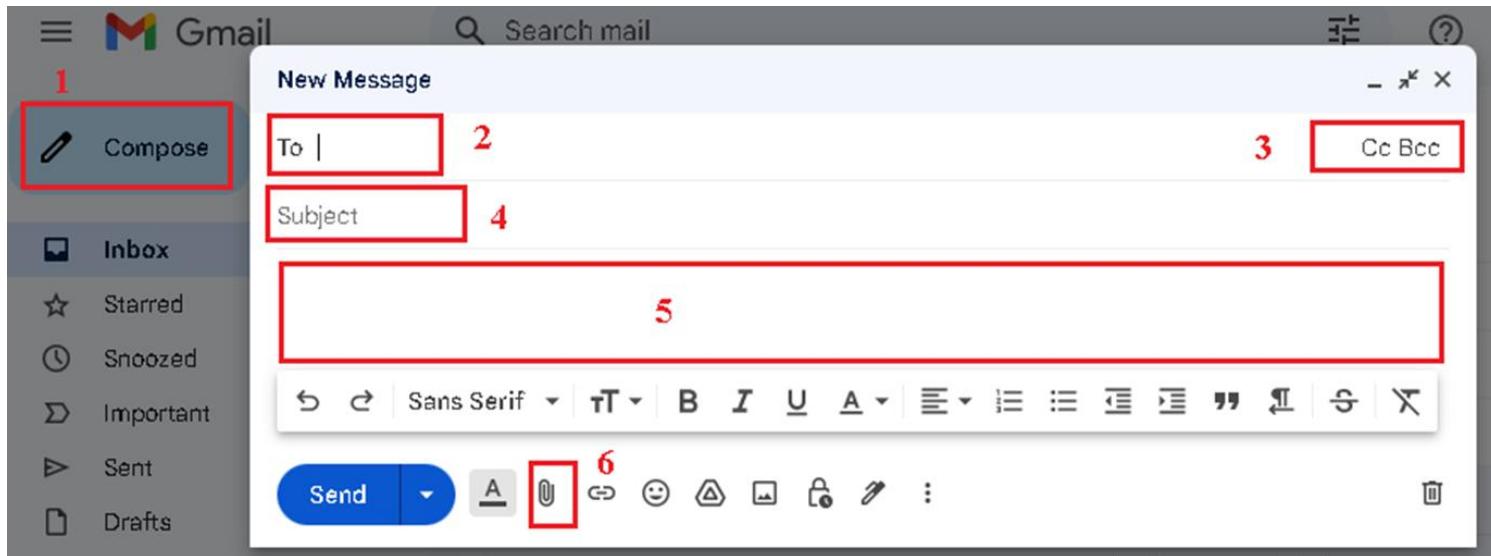

- 2) You can move download the attached file, forward, **delete** or **reply** to your message.
- 3) Click on the "Answer" to reply to your correspondent, and click on "**To transfer**" to forward the email to another person.

Write and send an email

- 1) To send an e-mail, click on the button "Compose" located above the folder list. An input form appears in the Gmail interface.
- 2) In the field "To": type the email address of the person you want to write to. If there are multiple recipients, separate the email addresses with commas.
- 3) Other fields exist if you want to put a person in copy of your message "CC" or in hidden copy" BCc".
- 4) In the field, "Subject:", type the subject addressed in the email

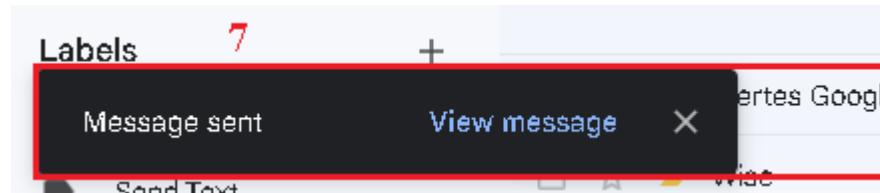

Write and send an email

Next, enter the text message.

- 6) It is also possible to add attachments to the message (images, texts, videos, etc.). To do this, click on "Attach a file" then on the button "Browse" to select a file stored on your hard drive.

- 7) When you have finished typing your email, click on the button "Send" to ship it immediately, or press the button "Save" to save it as a draft. Once your message is sent, a message will appear at the top confirming the message has been sent.

Tips for surfing the internet safely

The basics

- 1) To protect your computer against any intrusion via the internet, install an antivirus and perform scans regularly
- 2) Automatically update your operating system (for example, Windows 7) and your installed software.
- 3) Regularly make a backup copy of your important data on an external hard drive or on the cloud (Google Drive, Dropbox, OneDrive, etc.).
- 4) External files? scan them first with your antivirus before opening them: Do you receive a document by email or transfer files to your computer from a USB key? Always scan them before opening them.
- 5) Only install software if it comes from a reliable source: Never download software from the first website offered by a search engine (such as Google), but always opt for the official website software, for example to install Office 2013, you must download it from the official Microsoft website:
<https://www.microsoft.com/download>.

Tips for surfing the internet safely

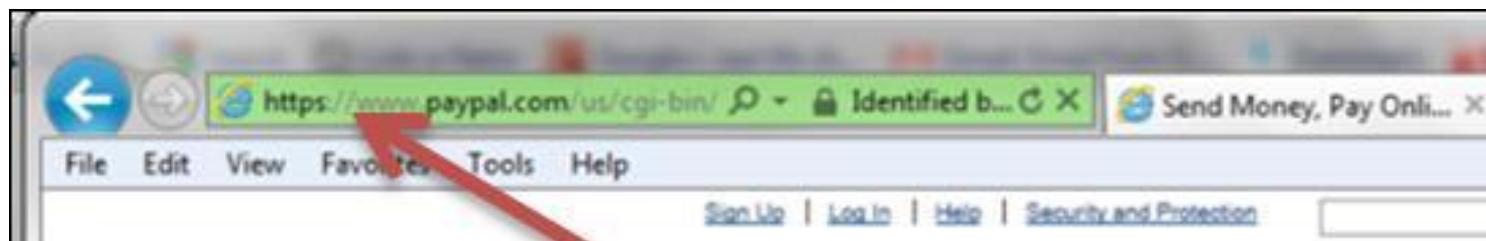

When using accounts

Choose secure passwords, use them once, and never share them. The longer and more complex the password, the better it is protected.

- 2) Connect in two steps to your internet accounts, such as email: In addition to your password, you must also enter a code to receive by SMS on your mobile phone.
- 3) Do not trust any company that contacts you by email or phone asking for personal data.

When you pay online (ePayment)

When you pay online, you must check that the web page uses the protocol "https".

When using a wireless connection

- 1) Be careful when using public Wi-Fi
- 2) When working on a public Wi-Fi network, do not enter your passwords or banking information.
- 3) Protect your home Wi-Fi network (network in your home), by securing it with a password. This way, no one will be able to use your Wi-Fi connection, whether it's a cybercriminal or your neighbor
