

Summary :

Since the economic openness, the Algerian state has worked to pay attention to local investment, which led to the establishment of a legal system that organizes this field and works to open the door to local investors, especially in the recent period and the great focus on the so-called shadow areas by the government and support for investment in them.

In this regard, a group of central and local bodies and agencies have been monitored, working to overcome the obstacles facing investors who suffer from several problems to glorify their projects on the ground, we mention the National Investment Council and the National Investment Agency at the central level, the governor and the management of state property in addition to the single window. Decentralization at the local level.

Key words: local investment; National Investment Board; National Investment Agency; The viceroy; Management of state property; The decentralized single window.
