English S1 Exam/M1 PEP

Name: _____**Surname:** _____

Text for the Exam

Last week, a well-known technology company reported that several internal designs for upcoming electronic devices had been stolen. The thieves sent a message claiming they had taken the files from the company's cloud storage system.

According to the head of security, the attackers demanded money in exchange for not posting the confidential blueprints online. "They insisted that the company must respond within forty-eight hours," he explained.

Specialists stated that digital theft in the technology sector is increasing rapidly. One expert mentioned that such incidents could delay product launches, harm customer trust, and give competitors unfair advantages.

Despite the threats, the company refused to negotiate. Investigators later revealed that the attackers used advanced encryption tools to cover their tracks, and the case is still under investigation.

Part 1 – Reading Comprehension (2p)

A. Answer the questions:
1. What did the thieves steal?
_____
2. How did the attackers claim to obtain the files?
_____
3. What did the attackers demand from the company?
