

To the Master 1 students (Physics Department)

Dear students,

Could you, please, execute the following task (work), before the resumption of the course:

1/ Prepare a list of science terms in English (between 20 and 30 words) and find their equivalent in Arabic and French. Of course this list will be different for every speciality!

2/ Find a science text (written in English) on the internet (about a Physics topic of your choice), which is about 15 sentences long. Then:

a/ Make a summary in, say, 4 or 5 short sentences, of this text.

b/ Translate the original text, from English into Arabic or French (the choice is yours).

The students can organize themselves as groups of 2 or 3.

Please, present your the accomplished work, as a report when the University, hopefully, reopens.

Finally, you will be given a mark for the report.

Good luck to all !

Mr. SEBTI Karim
